Deep thoughtful planning experience

We are problem solvers. We are equipped with the resources and expertise necessary to pivot in any direction necessary to address challenges that come up for our clients and projects.

PLANNING AT WGI

**PLANNING, DESIGN, AND POLICY EXPERTS
TAILORED APPROACH**

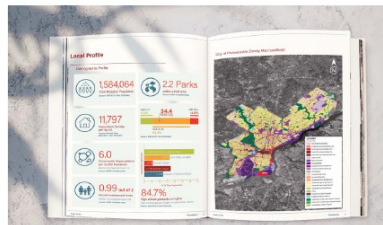

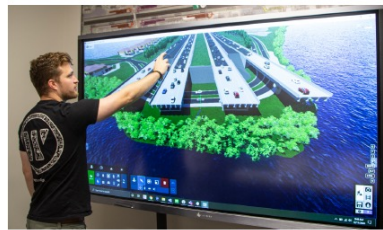

ONE-STOP-SHOP FIRM

As a full-service firm with a strong specialty in planning and development, our team will provide our client with the in-house knowledge and experience to address its needs in land use, municipal operations, redevelopment, complete street design, designing people-centered environments, sustainability, resiliency, adaption, utility infrastructure, and capital improvement projects.

DATA ANALYTICS

We have built a strong reputation for delivering comprehensive data solutions. Our tools include GIS, spatial analytics, data science and behavioral modeling, and performance monitoring and metrics. We offer these services to inform our stakeholders, ensuring they make data-driven decisions.

**SUSTAINABILITY,
RESILIENCY,
ADAPTATION**

**Resilient
infrastructure equals
resilient communities**

A key component to our vision is sustainability, resilience, and adaptation (SRA) awareness. The solutions we provide address today's concerns while taking into account how these improvements will serve you and your residents into the future. We take pride in implementing SRA principles into our projects.
